Basic Collapsible

Collapsibles are useful when you want to hide and show large amount of content:

[Click Me](#)

Example

```
<button data-toggle="collapse" data-target="#demo">Collapsible</button>

<div id="demo" class="collapse">
  Lorem ipsum dolor text....
</div>
```

Example Explained

The `.collapse` class indicates a collapsible element (a `<div>` in our example); this is the content that will be shown or hidden with a click of a button.

To control (show/hide) the collapsible content, add the `data-toggle="collapse"` attribute to an `<a>` or a `<button>` element. Then add the `data-target="#id"` attribute to connect the button with the collapsible content (`<div id="demo">`).

Note: For `<a>` elements, you can use the `href` attribute instead of the `data-target` attribute:

Example

```
<a href="#demo" data-toggle="collapse">Collapsible</a>

<div id="demo" class="collapse">
  Lorem ipsum dolor text....
</div>
```

By default, the collapsible content is hidden. However, you can add the `.in` class to show the content by default:

Example

```
<div id="demo" class="collapse in">
  Lorem ipsum dolor text....
</div>
```

Example

```
<div class="panel-group" id="accordion">
